

We are pleased to announce the latest release of Datacenter Clarity LC[®], version 2.4, which includes many new features and enhancements.

Asset management in the web client

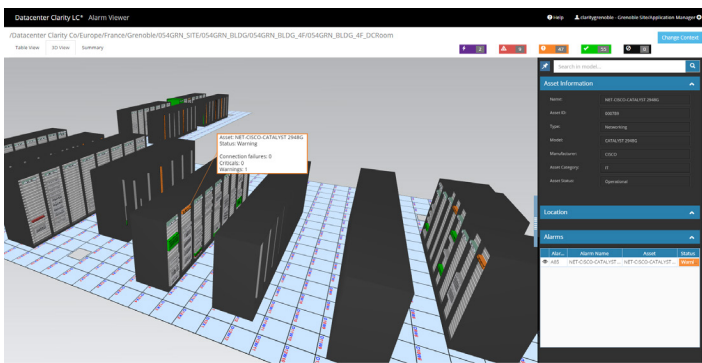

You can now move, add, and remove assets directly in the web client.

The Workbench lets you manage rack-mounted, chassis-mounted, and embedded assets in the 3D Viewer. You can also change asset attributes or place the asset into the inventory.

Alarm management in the web client

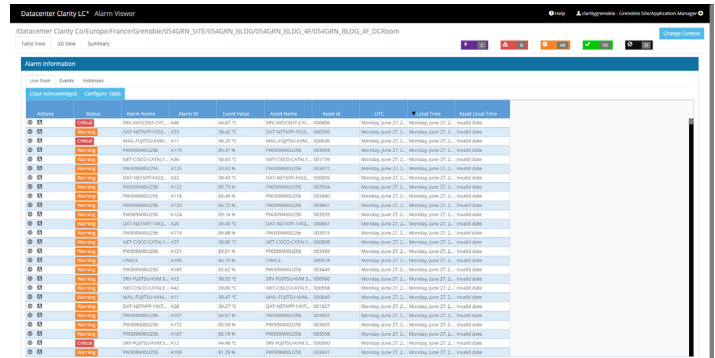

Use the Alarm Viewer module in the web client to view real-time information on alarm events and information on alarm instances and event history.

With the Alarm Viewer, you can:

- Monitor and acknowledge the real-time status of the alarm events.
- View a 3D image and status updates of the assets that the alarms are monitoring.

- Review attributes of the asset that the alarm is monitoring.

Web API support

Datacenter Clarity LC provides a Web Service Interface (web API) with interactive online documentation. The documentation is based on Swagger and is a run-time representation of the API.

Work order and cable label reports

In the Asset Management Environment, you can now generate the following work order reports:

- Installation reports
- Cable label reports

You can also configure the report templates to include the information you desire.

3D Viewer enhancements

- You can now control the visibility of assets by asset type and the display of asset tags by asset type on your model displayed in the 3D Viewer.
- You can now search for assets using attribute values.
- You now have access to more commands when you right-click a displayed asset or in the background.
- Datacenter Clarity LC remembers the last asset you displayed in the 3D Viewer and the last camera viewpoint you used.

EMIP Library enhancement

In the EMIP Library module, you can now modify all

EMIP entry attributes including pre-defined EMIP entry attributes.

Software version support changes

Datacenter Clarity LC version 2.4 works with:

- MongoDB 3.0.11
- OSIsoft PI AF Server and PI Data Archive 2015

Issues Resolved in Version 2.4
